Bespoke Foil Company
Memory Catcher.

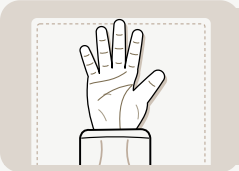

For your team

Taking a print *take your time*

Your team takes the handprint and thumbprint, on one A4 sheet, with the person in your care. Your Memory Catcher™ or our team can talk you through it, but the print itself is always taken by your team.

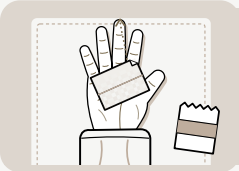

Before you begin

- The order form is filled in with the family
- A flat, firm surface and a book or clipboard
- One A4 sheet and the inkless wipe, with two spare sheets

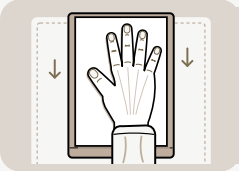

1 Prepare the hand

Make sure the hand is clean and dry. Gently open the fingers and rest the hand palm up.

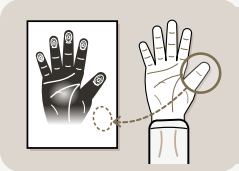

2 Use the inkless wipe

Wipe the palm, fingers and thumb, right to the fingertips. The wipe reacts with the sheet to leave a detailed print, with no ink and no mess.

3 Take the handprint

Rest the sheet on a book or clipboard. Gently lower the hand palm down onto it, press the palm and each finger, then lift straight up.

4 Add the thumbprint

Holding the thumb, press it gently onto the same sheet beside the handprint, then lift straight up.

5 Check the sheet

Look for the whole hand and the thumb. If a print is faint or incomplete, use a spare sheet. Small smudges are fine: our studio tidies them and keeps every line and crease.

6 Photograph and send

Lay the sheet flat in daylight and photograph it straight on, all four edges in view. Email the photo with the order form. Keep the original for the family.

Questions at any point? Your Memory Catcher™ or our team is here to help.
